PROFESSIONAL SUMMARY

Cloud Engineering Intern with hands-on experience in **AWS, Linux, Docker, Git, Nginx, and application deployment**. Experienced in deploying web applications on Linux-based cloud servers, containerizing applications using Docker and Docker Compose, configuring Nginx, and managing Node.js applications with PM2. Familiar with Jenkins CI/CD, Terraform, and Kubernetes, with a strong foundation in cloud infrastructure, networking, version control, and troubleshooting. Seeking an entry-level Cloud Engineer role to apply practical cloud skills and contribute to reliable and scalable infrastructure.

EDUCATION

Greater Noida Institute of Technology(AKTU)

10/2022 – 07/2026

Bachelor of Technology in Computer Science

Greater Noida

EXPERIENCE

Metconnect Infotech Private Limited

Aug 2026 – Oct 2026

Cloud Intern

- Worked with **AWS cloud infrastructure** and Linux-based servers for application deployment and management.
- Deployed web applications on **AWS EC2** and worked with **VPC, subnets, Internet Gateway, NAT Gateway, and Security Groups**.
- Containerized applications using **Docker** and created **Dockerfiles** and **Docker Compose** configurations.
- Configured **Nginx** as a web server/reverse proxy and used **PM2** for Node.js application process management.
- Used **Git** and **GitHub** for source-code management and deployment workflows.
- Worked with **Jenkins CI/CD** concepts and gained exposure to **Terraform** and **Kubernetes**.
- Troubleshoot **Linux server, Docker build, application deployment, networking, and resource-related** issues.

PROJECTS

Docker Production Setup – AWS Cloud Deployment

AWS / Docker / Linux

- Deployed a containerized React and Node.js application on an **AWS EC2** Linux server.
- Configured an **AWS VPC, subnet, Internet Gateway, and Security Group** for controlled network access.
- Created **Dockerfiles** for frontend and backend services and used **Docker Compose** for multi-container deployment.
- Configured **Nginx** as a reverse proxy/web server and used **PM2** for Node.js process management.
- Managed source code using **Git/GitHub** and configured environment variables for deployment.

Netflix Clone – AWS EC2 Deployment

AWS / Docker / Nginx

- Deployed a React and Node.js application on **AWS EC2** using a Linux environment.
- Configured **Security Groups** to control inbound access to application and web-server ports.
- Containerized frontend and backend services using **Docker** and **Docker Compose**.
- Configured **Nginx** for frontend serving/reverse proxy and used **PM2** to manage the Node.js application.
- Troubleshoot **EC2 resource limitations, Docker builds, environment variables, API configuration, and deployment** issues.

TECHNICAL SKILLS

- **Cloud:** AWS, EC2, VPC, IAM, Security Groups, AMI, Internet Gateway, NAT Gateway
- **Linux & Networking:** Linux, Subnets, Routing, DNS, TCP/IP, SSH
- **Containers:** Docker, Dockerfile, Docker Compose
- **Version Control:** Git, GitHub
- **Infrastructure :** Terraform, Kubernetes
- **Web & Process Management:** Nginx, PM2
- **Databases:** MySQL, MongoDB
